VENTILATION

FRESH AIR BY DESIGN

FRESH AIR BY DESIGN

Fresh air fills your home. A freshness you can count on for exceptional taste and a clean, healthy kitchen or outdoor grilling oasis. That's the promise on which Trade-Wind was built, and the promise it fulfills each day.

TRADE-WIND

PERFORMANCE + QUALITY + CUSTOMER SERVICE

At Trade-Wind, we appreciate the value of performance, quality, and customer service. These three pillars, anchored by a proud tradition of craftsmanship, guide the design and manufacturing of every range hood, insert, and outdoor grill hood Trade-Wind produces.

Headquartered at an 80,000-square-foot design and production facility in Phoenix, Arizona, Trade-Wind is home to over 50 employees, who take pride in what they do. Every stainless-steel blower housing, every baffle, every light bulb, is individually inspected and hand-tested before leaving the factory to ensure it performs to the highest quality standards. It's a testament to the human care and devotion that distinguishes an internationally recognized brand, distributed across North America and beloved by designers, builders, and homeowners.

VENTILATION MATTERS

More and more appliance dealers, designers, builders, and homeowners are coming to appreciate what Trade-Wind has long known: Cooking ventilation matters. Powerful and consistent air circulation, coupled with effective filtration, keeps grease from coating your kitchen surfaces. It ensures indoor and outdoor air—each so important for our health and well-being—remain clean, fresh, and free of harmful gasses and particulates. Perhaps most of all, it removes unwanted aromas that, left to disperse and settle, can quickly overstay their welcome.

Trade-Wind is among an elite portfolio of global Middleby Residential brands whose collected knowledge, financial strength, and impressive track record of technological innovation have established the organization as a recognized leader in home kitchen appliances.

ART & SCIENCE

Architecturally distinctive, expressive in form and color, and available in a range of styles and finishes, Trade-Wind hoods have earned their reputation as the rightful crown jewel of your kitchen.

Carrying the artistry of a range's design from floor to ceiling, they exhibit elegant craftsmanship, with slender, evocative profiles that cleverly disguise inserts containing LED lights and high-grade steel filters and blower wheels.

At Trade-Wind, we take great pride in our engineering and design skills. Whether you're looking for a standard model to complement your kitchen range or outdoor barbeque grill, or a custom-fabricated hood with the size, shape, materials, color, and trim selections to complete your dream kitchen, Trade-Wind is your artisan partner to make your vision a reality.

All our products are crafted, wholly or in part, from corrosion- and temperature-resistant 304-grade stainless steel mixed and finished exclusively at North American Stainless mills. To achieve the highest level of precision, each steel blank is sliced and shaped into a dimensionally accurate, 3D CAD-specified form. Advanced, computed-guided machine tooling and painstaking attention to product design and assembly ensure the superior durability and performance of all Trade-Wind products, which are protected by a three-year parts and labor warranty.

OUR PRODUCTS

Range hoods are an essential appliance for your kitchen. Built with internal blowers and filters to remove smoke, odors, and heat from the home, they keep your indoor air fresh and ensure your surfaces stay clean and free of grease and oil. Installed over the stove to move air outside through the ducts in your walls, our stunning hood collections are among the most coveted in the industry. Available in a range of sizes, styles, colors, and finishes, or custom-built from scratch, they are crafted with impeccable style and grace to elevate the look of the entire kitchen.

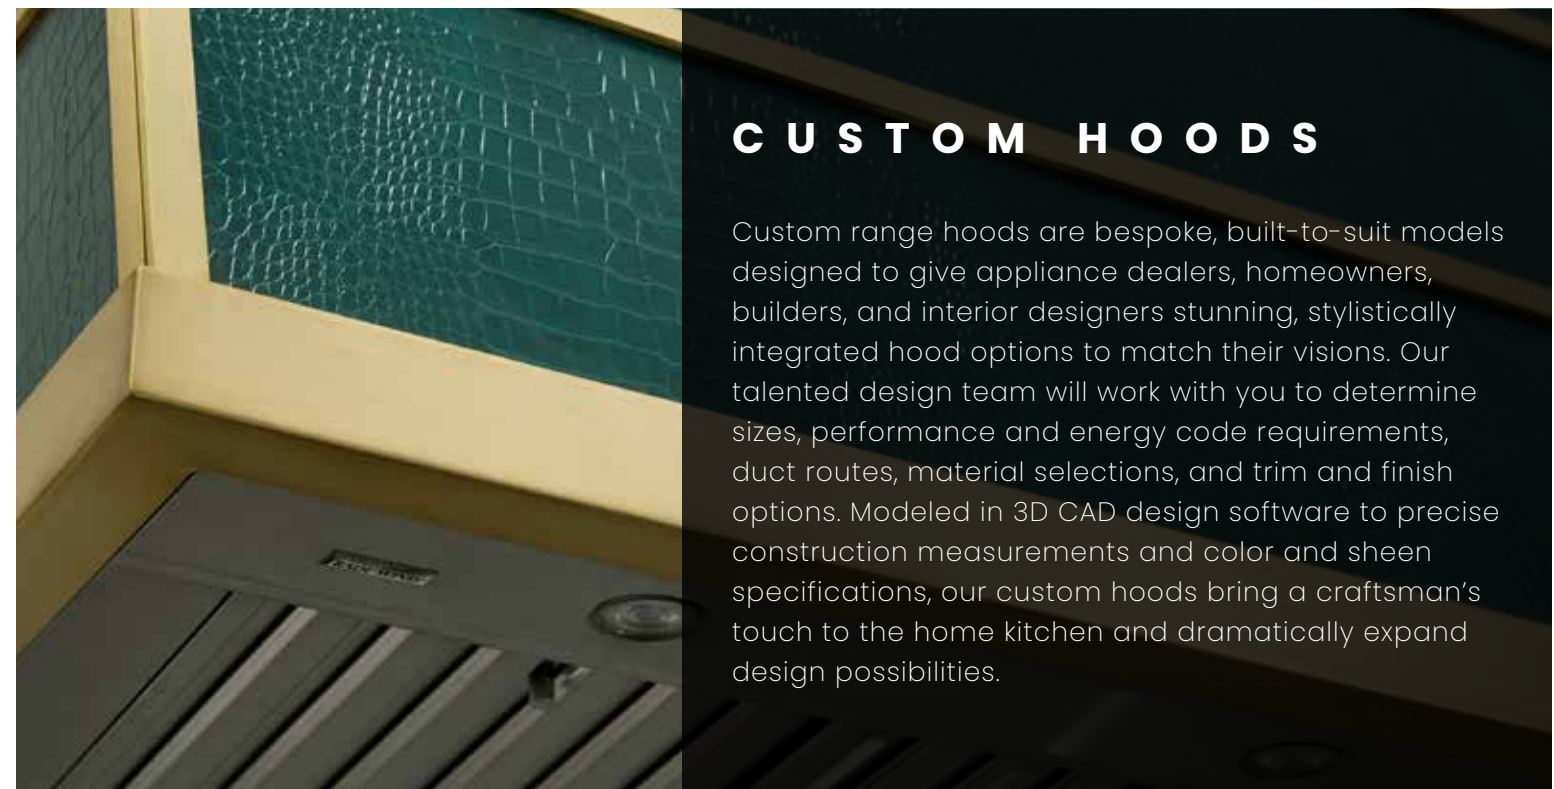

SELECT HOODS

Select is our premiere hood collection, offering optimal ventilation and style. Developed in partnership with designers at two storied Middleby European brands, AGA and La Cornue, the hoods are available in four distinctive styles – the Cascade, Euclid, Marquee, and Loge. Exquisite in form, they are available in more than a dozen expressive colors, with handsome trims, and 36", 44" and 48" models. Options for 600 and 1200 cubic feet per minute of airflow volume and a quiet sone range from 5-7 (50-56 decibels) ensures their stunning looks are matched with peak performance.

CUSTOM HOODS

Custom range hoods are bespoke, built-to-suit models designed to give appliance dealers, homeowners, builders, and interior designers stunning, stylistically integrated hood options to match their visions. Our talented design team will work with you to determine sizes, performance and energy code requirements, duct routes, material selections, and trim and finish options. Modeled in 3D CAD design software to precise construction measurements and color and sheen specifications, our custom hoods bring a craftsman's touch to the home kitchen and dramatically expand design possibilities.

ESSENTIAL HOODS

Essentials are sleek, durable range hoods for the contemporary kitchen. Built with high-grade stainless-steel, baffle filters, and exceptionally quiet blowers, Essentials hoods offer extraordinary performance for all your cooking needs. Available in sizes and styles to match nearly any range and décor, they are remarkably easy to clean and maintain. All models include electronic touch controls, LED lights, multi-speed motor control, and telescopic duct covers (excluding H3200). A companion remote control with adjustable speed settings and an optional automatic shut-off timer ensures lingering odors are removed from the home.

INSERTS

High-quality exhaust fans and filters are the key to keeping your kitchen fresh and free of smoke, odors, and residual grease. Our fully integrated stainless-steel inserts contain high-powered blowers, dishwasher safe baffle filters, and LED lights that brightly illuminate the cooking surface. Offered in multiple sizes, our inserts are known for their ability to fit snugly within virtually any enclosure, whether a custom-built cabinet set or stainless-steel hood assembly.

OUTDOOR HOODS

Anyone who has cooked burgers, steaks, or veggies on an outdoor barbeque grill knows they emit a massive amount of smoke. Trade-Wind outdoor hoods protect your eyes – and your lungs – by venting and filtering smoke and fumes. They also provide a code-required fire break between outdoor grills and any flammable surfaces above them, including overhanging roof lines and patio covers. Our outdoor hoods are built with heavy-gauge stainless steel, lit with LED lamps, and equipped with powerful internal motors. With large capture areas and the blower speed to handle the smoke and fumes of high-powered propane and charcoal grills, Trade-Wind hoods will transform your grilling experience.

SUPERIOR VENTILATION AND CLEANLINESS

Experience has proven that efficient, exceptionally quiet ventilation begins with the size and speed of the fan. Furnished with oversized 7" by 7" blower wheels, Trade-Wind inserts – the workhorses for thoroughly integrated ventilation systems – move a high volume of air at a low motor speed, resulting in range hoods that deliver exceptional power at a whisper.

To ensure optimal ventilation and leave kitchen surfaces spotless, our blowers are designed to work seamlessly with our baffle filters. Smoke and hot air pulled into the ducting by the blower wheel are carried through the beveled ridges of the filter, trapping oil, grease, and airborne particulates. Crafted with flat, smooth surfaces, stainless steel baffle filters are easily removed by hand, allowing for simple, dishwasher-safe cleaning.

OUR PEOPLE MAKE THE DIFFERENCE

At Trade-Wind, our most valued asset is our people. Many Trade-Wind staff members have worked at the company for more than a decade. Starting in entry-level roles in the warehouse or shipping department, they have advanced, through on-the-job training and mentorship, to upper-level management roles.

A compassionate, family-friendly culture permeates the organization. That culture extends from our deeply held conviction that all employees should be treated with respect and dignity. All employees are known by name and we care deeply about their well-being. Ultimately, happier employees produce better products.

It's a story repeated time and again at a company whose leaders understand quality design and craftsmanship are wrought not only in the studio, but in dedicated hours of apprenticeship. With competitive wages, a hard-working collaborative atmosphere, and an unified belief in human potential, Trade-Wind has provided a path to success for talented workers from an array of diverse backgrounds. Put simply: Trade-Wind invests in people to excel in quality.
